

CEDAR GROVE[®]

What you need to **KNOW** about bags

In your ORGANICS container

No plastic bags of any kind are accepted in your organics container

Plastics do not break down and hinder the compost process

Approved compostable bags are accepted in your organics container

As a Cedar Grove customer, you are eligible for discounted pricing on approved compostable packaging, including bags. Please contact packaging@cgcompost.com for more info.

In your RECYCLING or CDL container

No black plastic bags are accepted in the recycling or CDL container

Neither our drivers or facility teams can determine what is inside a black plastic bag just by looking at it, and they must be handled as trash and potentially hazardous

Recyclables are preferred loose, or bagless

* Processing facilities are charging fees per black plastic bag found, * which may lead to additional charges
